EMMANUEL QUANSAH

GIS & Geospatial Analyst | GIS Specialist

Cape Coast, Ghana | +233 555 879 870 | emmanuel.quansah@stu.ucc.edu.gh

PROFESSIONAL PROFILE

Geography and Regional Planning student at the University of Cape Coast with practical experience in GIS, remote sensing, spatial analysis, cartography, field data collection, geospatial data organization and community-based research. Proficient in ArcGIS Pro and QGIS, with hands-on project experience in land-use mapping, spatial organization analysis, satellite-image interpretation and thematic map production. Experienced in facilitating GIS and Remote Sensing practical sessions and supporting users with geospatial analysis and map production. Interested in applying geospatial technology, data visualization and evidence-based spatial analysis to planning, environmental management and public-sector decision-making.

CORE GIS & TECHNICAL SKILLS

GIS & Mapping:	ArcGIS Pro; QGIS; ArcGIS StoryMaps; cartography; thematic mapping; land-use mapping; map layout and production
Spatial Analysis:	Spatial analysis; settlement-pattern analysis; land-use assessment; geospatial data interpretation
Remote Sensing:	Satellite-image interpretation; remote sensing fundamentals; environmental applications
Field & Data:	GPS data collection; community surveys; enumeration; KoboToolbox; data organization; data cleaning
Visualization & Office:	Data visualization; Microsoft Excel; Word; PowerPoint; Google Earth Pro
Professional:	Community engagement; communication; teamwork; project coordination; report writing; problem solving

EDUCATION

University of Cape Coast — Bachelor of Science (B.Sc.), Geography and Regional Planning | 2023 – Present
Relevant coursework: Geographic Information Systems, Remote Sensing, Cartography, Environmental Planning, Natural Resource Management, Land Use Planning, Spatial Analysis, Research Methods, Regional Analysis, Climatology and Oceanography, Urban Design.

RELEVANT EXPERIENCE

GIS & Remote Sensing Tutorial Facilitator | 2024 – Present
Department of Geography & Regional Planning, University of Cape Coast

- Facilitate practical GIS and Remote Sensing sessions for undergraduate students.
- Train students in ArcGIS Pro and QGIS for spatial analysis, map production and thematic mapping.
- Support satellite-image interpretation and practical geospatial analysis.
- Guide students in developing thematic maps for planning and environmental applications.

Enumeration Leader | 2024
Research Project

- Led a team during field data-collection exercises and coordinated community survey activities.
- Monitored data completeness and quality during fieldwork.
- Organized field datasets for GIS analysis and visualization.
- Worked collaboratively with research teams to meet project objectives.

Personal Assistant | 2022 – Present
Ahanta West Traditional Council

- Assisted with administrative documentation and official correspondence.
- Supported community engagement and stakeholder meetings.
- Coordinated schedules and maintained institutional records.
- Contributed to local development initiatives through effective communication and coordination.

Organizing Secretary | 2024 – 2025
Ghana Association of Students Planners (GASP), University of Cape Coast

- Organized academic workshops, GIS field exercises and planning activities.

- Coordinated logistics for departmental events and fieldwork.
- Promoted collaboration among students and faculty members.
- Assisted in organizing professional development programmes.

SELECTED GIS PROJECTS

Land Use and Spatial Organization Analysis — Ntranoa

- Conducted community field surveys and land-use assessments.
- Collected and organized geospatial data using field-survey workflows and KoboToolbox.
- Produced thematic land-use and spatial-organization maps using ArcGIS Pro and Google Earth Pro.
- Applied spatial analysis techniques to evaluate settlement patterns and spatial organization.
- Developed map layouts to communicate findings for planning and decision-making.

GIS Mapping and Spatial Analysis Projects

- Created digital maps using ArcGIS Pro and Google Earth Pro.
- Processed and analyzed spatial datasets for planning and environmental studies.
- Interpreted satellite imagery for environmental applications.
- Applied GIS techniques to planning and land-management problems.

INTERACTIVE GIS STORYTELLING

ArcGIS StoryMaps Project

- Developed and published an interactive ArcGIS StoryMaps project to communicate geographic information through maps and narrative content.
- Applied web-based GIS storytelling to present spatial information in an accessible format for users and stakeholders.

CERTIFICATIONS & TRAINING

- 15+ Esri GIS Professional Certificates
- NASA Fundamentals of Remote Sensing
- Geo University — Introduction to Remote Sensing
- EO College — Introduction to Machine Learning for Earth Observation
- n8n AI Automation Certificate

LEADERSHIP & PROFESSIONAL INVOLVEMENT

- Organizing Secretary, Ghana Association of Students Planners (2024–2025)
- Course Representative — GIS & Remote Sensing
- Course Representative — Natural Resources
- Church Youth Leader
- Financial Secretary
- School Prefect

AREAS OF INTEREST

GIS and Remote Sensing • Spatial Data Visualization • Community Mapping • Land Use Planning • Environmental Monitoring • Natural Resource Management • Community Conservation • Sustainable Development
